Instructions

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean. A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic country, in which roasted parts of sentences fly into your mouth. Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lorem Ipsum decided to leave for the far World of Grammar.

Upon clicking this link, the system will display a pop-up, which displays the following text: "A matrix is a framework for guiding users through the process of creating an electronic portfolio or ePortfolio (i.e., A personal, digital collection of assignments, documents, videos, and other items that demonstrate academic growth). In a matrix, ePortfolio assignments are represented as cells organized into rows and columns with descriptive titles. When you submit your work, it will appear in the specified cell(s)."
2	Cell Name: The system will display a clickable link in the form of "<Cell Title>" for all cells this assignment is associated with. Upon clicking this link, the system will display a thickbox widget with the information contained in the SV: View Linked Item Info screen (VLII-1). The thickbox widget will consume as much vertical space as a 1024x768 screen allows to ensure that minimal scrolling is required.

I think that DPA is off on another IT misadventure in trying to impose IT on people and process that do not wish it. The business case for this is dodgy at best. They would be wise to let some other port suffer through the assured horror of building this system and then license the system as a fast follower!!!

{{Agreed. We must include Customs now as the proposed efficiencies and savings are not possible unless Customs participates. Freezing them out or not including them will just make things worse over a year or two.}}

Assignment Feedback

A rich text editor interface. The toolbar at the top contains various icons for text formatting (bold, italic, underline, text color, background color), alignment (left, center, right, justified), indentation, bulleted and numbered lists, link and unlink, insert (table, image, video, audio, link, unlink), and undo/redo. Below the toolbar are four dropdown menus labeled 'Style', 'Format', 'Font', and 'Size'. The main area below the menus is a large, empty white rectangle for text input.

Professional Writing for Visual Media

Submitted Apr 7, 2008 12:52 PM

Submitted Text

Indiana University is currently looking for a talented and highly motivated Visual Media Instructor for our Recording Artist Program.

Indiana University has a top-ranked school of music located in Bloomington, Indiana. Our students arrive with a passion for music and leave with the practical knowledge, technical skills and hands-on experience that it takes to transform their aspirations into careers.

The successful candidate will be able to develop and teach an introductory course in visual media to independent musicians. This program is aimed at musicians who want to record and release their own music (Students will learn about recording and general music business concepts in other classes).

Submitted Text

I think Michael Moore's "Bowling for Columbine" is the best documentary I've ever seen. Moore takes on the subject of guns in America, but it seems to me the film is really more about the larger topic of the country's so-called culture of violence. He doesn't get into specific public-policy issues; instead he presents some freewheeling reflections on why so many Americans are killed with guns.

Moore's dark humor made me laugh a lot while watching the movie, but he did leave me pondering certain aspects of American history, mass media, and racial tension. While I don't entirely endorse Moore's views and methods, I found "Bowling for Columbine" to be well worth watching.
