Notes for Permissions (P-1.1)

Note #	Functional Notes
N/A	Users with the site.upd permission accessed this screen by clicking 'Assignments' from the list of tools on the left and then 'Permissions' from the list of links at the top of the frame.
1	Read assignments: - The system will display the list of assignments on the Assignment List screen (AL-1 or SVAL-1) to the role(s) with this permission.
2	Submit assignments: - The system will provide the ability to submit assignments.
3	Add assignments: - The system will display the 'Add' link on the Assignment List screen (AL-1) to the role(s) with this permission.
4	Edit assignments: - The system will display the 'Edit' link on the Assignment List screen (AL-1) to the role(s) with this permission.
5	Remove assignments: - The system will display a column of checkboxes along with 'Remove' buttons on the Assignment List screen (AL-1) to the role(s) with this permission.
6	View Submissions: - The system will display the 'Grade' or 'Provide Feedback' link on the Assignment List screen (AL-1). - The system will display the 'Feedback' and 'Feedback Attachments' sections and the 'Save' and 'Save and Release Feedback' buttons on the View Student's Submission screen (VSS-1) .
7	View All Groups: - The system will permit the role(s) with this permission to view and act on all students and all groups in the site in accordance with the other permissions that have been assigned to this role (e.g., Add, Edit, Remove). Note¹: Users in role(s) that are not assigned this permission may only view or act on an assignment if it is released to the group in which he/she is a member. If the assignment is released to multiple groups and the user is not a member of every group, then the user will not have permission to view or act on the assignment. Note²: Users in role(s) that are not assigned this permission may only view or act on submissions if they were submitted by a user in a group in which he/she is a member.

Notes for Permissions (P-1.2)

Note #	Functional Notes
8	<p>Grade submissions from:</p> <ul style="list-style-type: none"> - If there is no Gradebook in the site, the system will not display this permission. - This Gradebook permission controls whether or not the role(s) with some variation of this permission can enter a grade and comments for student submissions. - The system will display the 'Customize' link for roles with the section.role.ta permission and the gradebook.gradeSection permission. - By default, if groups exist in the site, the system will display 'Assigned Groups' for role(s) with the section.role.ta and gradebook.gradeSection permissions. Role(s) with these permissions will have permission to enter a grade and comments for submissions from students in the user's assigned group(s). If groups do not exist for the site, the system will display 'None' and the 'Customize' link beneath 'None'. <p>Note: The instructor may increase or limit the scope of these permissions by clicking the 'Customize' link.</p> <ul style="list-style-type: none"> - If the Instructor clicks the 'Customize' link, the system will display the Gradebook's Edit Grader Permissions' helper (GPH-1). - The system will display 'All Students' for the roles with the gradebook.editAssignments, gradebook.gradeAll and section.role.instructor permissions. Role(s) with these permissions may enter grades and comments for any student in the class. - The system will display 'None' for roles that do not have the one of the above combinations of permissions and may not enter grades or comments for any submissions.
9	<p>Save</p> <ul style="list-style-type: none"> - Upon clicking Save, the system will save the changes to the permissions, return the user to the Assignment List screen (AL-1) and display the following confirmation message to the instructor: "Your changes to the permissions were saved successfully."
10	<p>Cancel</p> <ul style="list-style-type: none"> - Upon clicking Cancel, the system will return the user to the Assignment List screen (AL-1) without saving any changes.

Notes for Grader Permissions Helper (GPH-1.1)

Note #	Functional Notes
N/A	The user accessed this screen by clicking the 'Custom (Edit)' link from the Permissions screen (P-1).
N/A	Default Permissions - By default, users in role(s) with the section.role.ta permission and the gradebook.gradeSection permission have permission to grade submissions from students in his/her assigned groups. To change the default permissions, users with the site.upd permission may add Grader Permissions as described below.
1	Esc key or close - Upon clicking the 'close' link, the system will clear any changes, close the helper window and return the user to the Permissions screen (P-1).
2	Message - The system will display the following message to the user: "You are editing Gradebook permissions"
3	Select a Grader to Edit - Upon clicking the 'Select a grader to edit' drop-down, the system will display the list of users that have the section.role.ta permission and the gradebook.gradeSection permission. - Upon selecting a user from the drop-down, the system will display all rules associated with that user.
4	Permission - By default, users in role(s) with the section.role.ta permission and the gradebook.gradeSection permission have permission to grade submissions from students in his/her assigned groups. To change the default permissions, users with the site.upd permission may add Grader Permissions as described below. - If an instructor wishes to increase or limit the scope of a TA's grading permissions, he/she can do so via the Grader permissions. - The Grader permissions consist of the following options: <ul style="list-style-type: none"> * 'Grade' or 'View': The presence of the 'Grade' permission directs the system to display an editable 'Gradebook Details' section on the View Student's Submission screen (VSS-1). The presence of the 'View' permission, in the absence of the 'Grade' permission, directs the system to display a non-editable 'Gradebook Details' section on the View Student's Submission screen (VSS-1). * 'All Categories' or '<Specified Category>' (Does not display if no categories exist in the Gradebook): By selecting 'All Categories' the instructor is indicating that the user should have permission to view and/or grade all assignments associated with gradebook items in all categories, including the unassigned category. By selecting a '<Specified Category>', the instructor is indicating that the user should have permission to view or grade only the assignment(s) associated with gradebook items in the specified category. * 'All Sections/Groups' or '<Specified Group>' (Does not display if no groups exist in the site): By selecting 'All Sections/Groups', the instructor is indicating that the user should have permission to view and/or grade all student submissions. By selecting a '<Specified Group>', the instructor is indicating that the user should have permission to grade submissions from students in the specified group. Note: These permissions work hand-in-hand with the Assignments Beta permissions. The system will first check the View Submissions permission to see if the user has permission to view submissions in Assignments Beta. The system will then check the View All Groups permission to determine which student submissions to display to the user. The system will then check the Gradebook permissions and, if they exist, the Grader permissions, to determine if the user has permission to grade a student's submission.

Notes for Grader Permissions Helper (GPH-1.2)

Note #	Functional Notes
7	Delete a Rule - If an instructor clicks the delete a rule icon (), then the system will remove that rule for the associated user and the change will take place once the instructor clicks 'Save Changes'.
8	Add a Rule - If an instructor clicks 'Add a rule', then the system will add a new rule for the associated user with the following default settings: Permission: View, Category: All Categories, and Sections/Groups: All Sections/Groups.
9	Save Changes - Upon clicking 'Save Changes', the system will save any changes made to the rules for each user edited, close the helper window, and return the user to the Permissions screen (P-1).
10	Clear Changes - Upon clicking 'Clear Changes', the system will clear any changes made to the rules for each user edited, close the helper window, and return the user to the Permissions screen (P-1).
